Absatz	EN 13613:2009	Bewertung
Clause	Anforderungen - Prüfungen / Requirements - Tests	Evaluation

Clause	Test Items	Result
1	Scope This standard specifies requirements for non-motorized skateboards which are supplied for use by one rider at a time. The skateboards covered by this standard are grade by performance criteria for different categories of body weight. This standard is not applicable for skateboards for use by a rider up to 20kg. EN 71-1 is applicable for those. This standard does not apply to individual components	
2	Normative references	
3	Terms and definitions	
4	Classification	
4.1	Class A: Skateboards intended for use by a rider of more than 20kg up to 100kg.	Class B
4.2	Class B: Skateboards intended for use by a rider of more than 20kg up to 50kg.	
5	Construction	
5.1	General	P
5.2	Requirements	
5.2.1	There shall be no projections above the upper surface of the deck. The complete upper surface of the deck shall be equipped with an anti-slide surface.	P
5.2.2	When tested in accordance with 6.8, it shall not be possible to touch, with the test cylinder, any projection which has a length greater than 10 mm and less than 100mm ² in area.	P
5.2.3	When the action bolt (kingpin) of the truck is fully tightened, no part of the action bolt shall be in contact with underside of the deck.	P
5.2.4	If a part of the axles and means of securing the wheel shall project beyond the outer edge of the wheels than the axle and means of securing the wheels shall not project beyond the deck. All edges on the skateboard which can come into contact with parts of the body during normal use shall be rendered safe, or shaped so that injuries cannot occur.	P

5.2.5	The corners and edges of the deck shall be rounded off and free from burr and sharp or protruding edges. The outline of the deck shall be rounded off with a minimum radius of 10mm.	P
5.2.6	Where self-locking nuts are used, the entire thread, including the locking section, shall be in contact with the bolt. Self-locking nuts and other self-locking fixings that are loosened several times for the purpose of modification or servicing, shall be suitable for this purpose. The information supplied by the manufacturer shall indicate if self-locking nuts and other self-locking elements can lose their effectiveness.	P
5.2.7	When tested in accordance with 6.5, the coefficient of adhesion of the wheels shall be a minimum of 0.3.	P
5.2.8	When tested in accordance with 6.6, the wheel bearing shall not get stuck or disintegrate.	P
5.2.9	When tested in accordance with 6.7, 6.9 and 6.10 no part of the skateboard shall break, there shall be no signs of functional damage and no fastening devices shall have worked loose.	P
6	Test methods	
7	Marking	N/T
8	Information supplied by the manufacturer	
8.1	General	N/T
8.2	Information about the construction of the skateboard	N/T
8.3	Instructions for use	N/T
8.4	Servicing and maintenance instructions	N/T
8.5	Skateboard safety code	N/T

Remark:

This test report documents the findings of examination conducted on the delivered product mentioned on page 1. This test report does not entitle to carry any safety mark on this or similar products. Further for sales or other application purposes of the tested product, any reference to TÜV Rheinland or a test through TÜV Rheinland is only permissible with prior written consent of TÜV Rheinland.
